Suspicion: Initial signs of potential compromise, triggering investigation and analysis for further validation

Crawling, acquisition, automated triage, and detection with comprehensive evaluation

Automated timeline reporting with detailed attack insights and precise timestamps.

Log file analysis for in-depth insights and forensic investigation

Situation assessment powered by a centralized information platform

TAILORED TO YOUR UNIQUE NEEDS, READY FOR IMMEDIATE ACTION

READY TO WORK
No time wasted on tool setup or infrastructure — instant deployment.

COMPLETE WORKFLOW
Rapid collection, analysis, validation, and implementation of countermeasures.

ONE CLICK FORENSICS
Seamless forensic data acquisition for experts and non-technical staff — remote or direct.

SCALABILITY
Custom backend solutions tailored to your needs, regardless of employee size.

ON BOARDING SUPPORT
Maximize the benefits of the framework for fast and accurate results.

ON-PREMISES
Complete analysis on-site, no cloud dependency.

PROPRIETARY COMMUNICATION SYSTEM
Secure exchange of data and IOCs with no external tracing.

LOCATION-INDEPENDENT
Manage incidents remotely from anywhere in the world.

COLLABORATION & MULTI-CLIENT
Collaborative triage of cyber threats in law enforcement and incident response.

MH

RAPID THREAT HUNTER
SMARTER INCIDENT MANAGEMENT

FRAMEWORK FOR RAPID AND COLLABORATIVE INVESTIGATION OF CYBER THREAT EVENTS

Achieve rapid and detailed artifact tracking in affected systems, delivering reliable initial results within just one hour.

Conduct a comprehensive triage analysis of an asset instantly, without delay.

Reliable identification of lateral movements through in-depth analysis and evaluation.
